

SAGE 100CLOUD

EXTENDED PROFILE

OVERVIEW

Sage 100cloud is a market-leading cloud-connected ERP platform for medium-sized manufacturers, distributors, and professional service businesses. Financials, budgeting and planning, inventory, supply chain, production management, reporting, and CRM are all part of the feature-rich solution.

Bank feeds and reconciliation automatically detects unrecorded transactions, find errors and discrepancies, and document corrections. Data from across the entire business are aggregated and may be automatically distributed to stakeholders when they need it.

Click-to-pay invoicing increases cash flow, and a self-service payment portal means a higher level of customer service. Anytime, anywhere mobile access to critical customer and vendor information means faster deal closures and improved communication across the organization.

Its business object framework allows for deep customization that persists with product upgrades. A vast ecosystem of connected solutions means that Sage 100cloud may be adapted to meet the specific needs of individual businesses today, and as they grow.

SAGE 100 CUSTOMIZATION AND INTEGRATION OPTIONS

Every business is unique, and Sage 100's source-available code base lets developers fully customize and integrate the software to align with your operations.

The platform's Business Object Framework features tools like Custom Office, Custom Scripting, and Visual Integrator, allowing you to create tailored solutions that remain compatible with future updates. Its seamless integration with Microsoft Office 365 also ensures users can access critical information and collaborate without switching between tools.
