

ORACLE FUSION CLOUD ERP EXTENDED PROFILE

OVERVIEW

Oracle Fusion Cloud ERP automates processes so you can grow your business. It's a web-based ERP suite that brings together all your finance, procurement, and operational data into a single, trusted view.

Built on a unified, multi-tenant platform, Fusion Cloud ERP updates quarterly, giving you the agility to adopt new business models and processes quickly. This helps you reduce costs, sharpen forecasts, and innovate faster without managing infrastructure.

Key modules and services include:

- Financials, with general ledger, accounts payable/receivable, cash management, and automated reconciliations.
- Accounting Hub, for centralized transaction processing and global compliance.
- Procurement, featuring supplier management, sourcing, and self-service purchasing.
- Project Management and accounting, to plan, execute, and monitor your initiatives end-to-end.
- Risk Management, for continuous controls monitoring, policy automation, and audit reporting.
- Enterprise Performance Management (EPM) for budgeting, planning, and forecasting across the enterprise.
- HCM covering core HR, talent management, and payroll services.
- Supply Chain Management from inventory and order management to manufacturing and logistics.
- AI-powered apps delivering embedded machine learning for recommendations, anomaly detection, and predictive forecasting
- Integration and analytics, with built-in tools for seamless connectivity (REST APIs, Oracle Integration Cloud) and real-time reporting via Oracle Transactional Business Intelligence (OTBI) and Oracle Analytics Cloud.

Oracle Fusion Cloud ERP offers continuous innovation through quarterly updates, embedded AI/ML to automate routine tasks (e.g., intelligent invoice processing, cash-flow forecasting), and seamless integration across Oracle's application portfolio and third-party systems.

All modules share a common data model and role-based access, ensuring data consistency, security, and compliance.
